Fiona MacAllister

Portland, OR | 555-0129 | fiona.macallister@example.test

SUMMARY

Linux systems administrator with 14 years of experience running production server fleets for regional hosting and logistics firms. Strong in patching, backup strategy and incident response, with a growing focus on automation and infrastructure as code.

EXPERIENCE

Senior Systems Administrator, Cascadia Freightworks

Portland, OR | Jun 2022 – Present

- Administer 220 Linux servers supporting dispatch and tracking systems with 99.95% annual uptime.
- Cut monthly patch window from 9 hours to 3 by scripting staged rollouts in Bash and Python.
- Led disaster recovery rebuild and test, reducing restore time for core databases from 14 hours to 4.

Systems Administrator, Harborline Hosting

Beaverton, OR | Mar 2017 – May 2022

- Managed web and mail hosting infrastructure for 1,800 small-business customers.
- Introduced centralized log collection and alerting, shortening mean time to detect outages by 40%.
- Mentored 3 junior technicians and wrote 35 runbooks used by the on-call rotation.

Junior Systems Administrator, Tillamook Valley Data Services

Salem, OR | Jul 2012 – Feb 2017

- Maintained 60 Linux and a handful of legacy Unix servers for county government clients.
- Automated nightly backups and verification, eliminating 12 hours of manual checks per month.
