Jamal Thibodeaux

Austin, TX | 555-0130 | jamal.thibodeaux@example.test

SUMMARY

Software engineer with 6 years of experience building back-end services and internal tools in Python and SQL. Known for pragmatic design, solid testing habits and clear communication with non-technical stakeholders.

EXPERIENCE

Software Engineer II, Lonestar Benefit Systems
Austin, TX | Feb 2023 – Present

- Build and maintain REST services handling 2 million claims-related requests per day.
- Reduced slowest database queries by 65% through indexing and query rewrites.
- Raised automated test coverage on the billing module from 48% to 82%.

Software Engineer, Pecan Street Logistics Software
San Antonio, TX | Aug 2020 – Jan 2023

- Developed route-planning features in Python used by 40 delivery fleets.
- Migrated a nightly batch job to an event-driven design, cutting processing time from 3 hours to 25 minutes.

Junior Developer, Gulf Plains Web Studio
Houston, TX | Jun 2018 – Jul 2020

- Delivered client websites and small web applications for 15 local businesses.
- Wrote reporting scripts that saved the account team roughly 10 hours per week.

EDUCATION

- B.S. Computer Science, Brazos Valley State University, 2018
